

# SYMBIO BI BOOSTER LIQUID ORGANIC FERTILISERS 6.2.4 3.0.8

## Benefits

- ✓ *High performance plant and soil nutrients and biostimulants*
- ✓ *Rapid assimilation through roots and shoots*
- ✓ *Stimulates photosynthesis and carbohydrate production*
- ✓ *Aids germination and survival of young grass*
- ✓ *Rich in proteins and amino acids to feed soil fungi for fine grass growth and thatch degradation*
- ✓ *Low salt index. Ideal for use with high conductivity water and soils*

**BioBooster Liquid Organic Fertilisers** are made from a combination of sugar beet and green waste BioBooster liquids may be sprayed through all conventional spraying equipment.

**Modes of Action** The proteins in Symbio BioBoosters when Used as a regular fertiliser or biostimulant BioBooster Liquid Organic Fertilisers feed the bacteria and fungi that form the base of the soil food web. This encourages nutrient retention, promotion of perennial grasses and thatch degradation. They will also improve soil friability for increased root development and faster percolation. When applied with a microbial inoculant BioBooster provides a readily available food source for the added microbes.

**BioBooster Liquid Organic Fertilisers** are in readily available form for assimilation through roots and shoots.

### APPLICATION AND TIMING

#### Foliar Application

50-100 litres per Ha in 200-400 litres of water as required.

#### Soil Drench

50-100 litres per Ha in 400-600 litres of water

#### As a biostimulant:

10 litres per Ha in 200-400 litres of water monthly through the growing season.

**BioBooster Liquid Organic Fertilisers** may be mixed with most liquid fertilisers and biostimulants. It is ideal as a complimentary fertiliser or biostimulant when tank mixed with Compost Teas. Fill tank 2/3 full with compost tea and water then predilute the BioBooster with an equal amount of water, and add to the spray tank after the compost tea

**Bio Booster Liquid Organic Fertilisers** may also be tank mixed with Symbio Fungi Booster, Symbio Silicon, Symbio HydroAid, Symbio Humic Booster, Symbio Fulvic Booster and Symbio Root Repair and most pesticides. Do not mix with metal sulphates. Bucket test before mixing in the spray tank.

#### Precaution

**IF SWALLOWED** Rinse Mouth, Do not induce vomiting

**IF ON SKIN** Gently wash with plenty of soap and water

**IF IN EYES** Rinse cautiously with water for several minutes

**PACK SIZE: 10L**
