ORGANIC AND PART ORGANIC

- ✓ Symbio 12.2.9 50% Organic Slow Release

INORGANIC SLOW RELEASE

- ✓ Symbio 20.0.10 50% SCU Slow Release
- ✓ Symbio 15.2.15 20% SCU Slow Release
- ✓ Symbio 7.0.10 with additional ThatchEating fungi
- ✓ Symbio 10.0.10 with additional ThatchEating fungi

APPLICATION AND TIMING

Part organic fertilisers should be applied at 35gms -75 gms per sq.m. Inorganic fertilisers at 25gms – 35gm per sq.m and watered in in the absence of rain.

The fungi and bacteria are activated by moisture. For best results apply before rain is forecast or irrigate for 2-3 minutes after application.

These fertilisers may be applied via any standard fertiliser spreader

These fertilisers are designed to give immediate growth with a long lasting slow release element. Ideally applied in late spring or early summer, they can be applied during the summer months

HEALTH AND SAFETY

S20/ 21 When using, do not eat, drink or smoke. S22 Do not breathe dust. S24/25 Avoid contact with skin and eyes.
