

SYMBIO BLUE WATER

Biological Treatment for problem Water Features, Ponds and Lakes.

- ✓ Controls blanket weed
- ✓ Helps to prevent green and cloudy water
- ✓ Reduces sludge build-up
- ✓ Eliminates odour problems
- ✓ Non-chemical, safe for fish

SYMBIO BLUEWATER is a natural formulation of bacteria, enzymes and buffers contained in a water-soluble sachet.

Some of the species of bacteria in **BLUEWATER** use the nitrates and phosphates that stimulate heavy algal growth as their own food source, starving the algae and reducing algal growth.

The remaining species break down the organic solids from fish and waterfowl excreta and decaying plant material that results in cloudy water, sludge build – up and foul odours.

ECOLOGY: **BLUEWATER** is harmless to pond animal life and to rooted plants. The microbes in BlueWater help to break down the toxic ammonia and nitrite compounds that accumulate in ponds with a large fish or waterfowl population, the use of Blue Water can create a less stressful environment for aquatic animal life.

NOTES Although Blue Water can be used at any time of the year, it performs best when water temperatures exceed 10°C.

SYMBIO BLUEWATER is best used as an algal preventative. If being used to clear growing algae, up to 4 weeks should be allowed for noticeable results.

For flowing ponds and lakes there should be an 80% retention of the water over a 4 week period to allow the product time to work.

Precaution

Avoid breathing dust. In case of inadequate ventilation, wear respiratory protection

IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. If experiencing respiratory symptoms call a doctor/physician.

Dispose of contents/container in accordance with local regulations

PACK SIZE
Blue Water Jnr 227g

APPLICATION

SYMBIO BLUE WATER is supplied in a 227gm sachet for larger lakes and ponds.

DOSAGE

For Larger Water Bodies Apply 1 x 227gm Blue Water sachet per 800m³ (176,000 gallons) per week through the algae growing season. This dose should be doubled for the first week.

APPLICATION

SYMBIO BLUE WATER JUNIOR is supplied in a 227gm sachet for smaller garden ponds, fishponds and water features.

DOSAGE

Apply 1 x 25g scoop per 25m³ (5,500 gallons) once every 2-3 weeks.

The dose should be repeated through the algae growing season.

PACK SIZE
Blue Water 8 x 227g ▪ 25 x 227g ▪ 50 x 227g
