

Grease Buster

Maintains clean, odour free grease traps. Powder form.

Action

SYMBIO GREASE BUSTER contains microorganisms specially selected for their ability to rapidly break down animal and vegetable fat and grease. They are fixed to a protective mineral support, which sticks to the grease in the trap and rapidly degrades it into its basic mineral elements, water and gas.

Application

Apply to sink or direct to the drain or grease trap followed by a little water in accordance with the dosage chart.

Composition

White powder containing specially selected saprophytic microorganisms on a mineral support which digest and break down fats, greases tartar and organic sulphur compounds.

Safety

The microorganisms in SYMBIO GREASE BUSTER conform to EC EFC Class 1. This class contains microorganisms which have never been described as causal agents in human illness and which pose no threat to the environment. Keep out of reach of children. Avoid inhalation and wash from skin or eyes with water. See health and safety sheet for full details.

Dosage chart

Meals per day	Weekly dosage
30-100	100 gms
100-500	200 gms
500-2,000	250 gms
2,000-3,000	500 gms
3,000-7,000	1,000 gms

Dosage instructions

Large Grease Traps (1m³ or 200 gals + meals per day)

Apply once a week. Split the dosage required and apply equal amounts to all sinks and drains leading to the Grease Trap. Wash down the drain with a little warm water.

Small Grease Traps and U Bends

Divide weekly dosage by three.

Apply every two days in equal amounts to all sinks and drains leading to the Grease Trap or U Bend. Wash down the drain with a little warm water.

For best results apply at the end of the day or when usage is light.

AVOID POURING BLEACH, CAUSTICS OR CONCENTRATED BIOCIDES INTO DRAINS AND GREASE TRAPS.

Notes

Keep away from heat and humidity.

Symbio provides a complete biological surface and drain-cleaning package which replaces toxic chemicals and maintains clean hygienic surfaces and clear odour free drains.
