

Deepclean

A powerful non-foaming powder combining the best enzymatic and surfactant technology to thoroughly clean oils fats and greases from porous floors.

Action

SYMBIO DEEPCLEAN removes dirt by breaking down the molecular structure, which binds the dirt to the support. Deepclean is NOT a solvent, or bleach. Deepclean works best when used with lukewarm water between 20°C-50°C.

Application

SYMBIO DEEPCLEAN is suitable for manual application and use with scrubber dryers, rotary brush and injection extraction machines. It can be reused for up to five days. Allow a contact time of between 1-15 minutes to work effectively.

Composition

Soluble powder, containing enzymes, biodegradable surfactants and nutrients. pH of 1% solution 7.5-8.5. Does not foam.

Safety

- Avoid inhalation of dusts.
- Users should wear protective gloves.
- Wash off skin/bathe eyes with water.
- If swallowed rinse mouth but do not drink. Seek medical attention if irritation persists. Keep out of reach of children.
- See health and safety sheet for full details.

Examples Of Usage and dilutions chart

Dilution treatment		Application
1:100-1:200	Removal of oil, grease & tyre marks on concrete, tiles & wood.	By hand or machine. Use strong brushing action, leave 1-15 mins brush again to release dirt from support and remove.
1:100-1:300	Deepcleaning porous floors	As above
1:100-1:300	Removal of fungus, mould, barnacles.	As above
1:100-1:300	Preparation of floors for sealing.	As above, leave floor for several days to see if more oil seeps to the surface. Repeat as necessary
1:200-1:500	Removal of oil, grease, polish, animal waste from concrete, tiles and wooden floors	By hand or machine. Apply with brushing action, leave 2-10 mins, and brush again to release dirt from support and remove.
1:400-1:600	Regular maintenance cleaning of concrete, wooden & tiled floors.	By machine. Apply with brushing action, With constant use action time is reduced to seconds.

Notes

Do not mix with chemical cleaners. Do not overdose. Deepclean does not become more effective at higher concentrations. Deepclean works well with all standard machines. For tyre marks & solidified grease a hard brush or pad is recommended. To work efficiently Deepclean must penetrate between the dirt and the surface to be cleaned. Deepclean continues to work deep into porous surfaces ensuring a thorough clean. For heavily polluted surfaces more than one application may be required.

- Packaging: 1.0kg, 3.0kg, 25.0kg
