

Autoluster

**Removes oil and traffic film from coachwork on cars, trucks and buses
Cleans and shines painted and metal surfaces. Frequent use builds up a barrier to assist the removal of graffiti. Ideal for heavily soiled trains and buses.**

Action

SYMBIO AUTOLUSTER is **not** a solvent. It contains enzymes, which break down the molecular structure and release the hydrocarbons from the support.

The by-products of this degradation process are more easily degraded themselves in effluent treatment plant. This is because the long complex hydrocarbon chains are broken up.

Application

SYMBIO AUTOLUSTER can be applied by spray or pressure washer, although some mechanical action may be required to remove built up dirt and graffiti. It can also be applied by mechanical car, train and bus washers.

Composition

SYMBIO AUTOLUSTER is an opaque viscous liquid containing over 60% active matter comprising enzymes and non-ionic surfactants.

Safety

- Users should wear gloves and, if spraying, a mask.
- Wash hands after use.
- If swallowed, rinse mouth but do not drink water.
- Wash from eyes with water.
- If irritation occurs and persists, seek medical advice.
- Keep out of reach of children.
- See health and safety data sheet for full details

Examples Of Usage and dilutions chart

Heavily soiled cars, trucks and buses: Dilute 1:100 and apply to surface with as much mechanical action as possible

Cars: Dilute 1:200 - 1:300 and wash in the usual way. Rinse and leave to dry then finish with a chamois leather.

Notes

DO NOT USE ON WATER-BASED PAINTS

N.B. Once diluted, use within 5 days!

Do not mix with chemical cleaning solutions.

To achieve additional degradation of the effluent and residue from retaining tanks, please call our Technical Services.
