

HYDROAID PLUS

A concentrated wetting agent for the prevention of dry patch and hydrophobic soil conditions

BENEFITS

- Low cost penetrating agent for all sports turf
- Use with Symbio's biological solutions to cure the problem not mask the symptoms of dry patch
- A long-term solution giving rapid gains in summer sward quality

How to apply:

Add required quantity of HydroAid Plus whilst filling sprayer to ensure thorough mixing

To prevent dry patch start to apply HydroAid Plus in Spring when the soil is still moist, apply at least monthly through the summer

If dry patch occurs, apply every two to three weeks until dry patch is under control, or spot treat affected areas as required

Do not apply HydroAid Plus in direct sunlight and irrigate after application with enough water to wash it into the soil

Always conduct a bucket test before mixing with organic biostimulants

Application guide: *For best results consult your Symbio representative.
