

LIQUID COPPER 6% Cu

Provides readily available plant nutrients with biostimulants.

BENEFITS

- Easy to apply
- Use as a foliar feed or soil drench
- Tank mixable with biostimulants, wetting agents, Liquid Aeration

Symbio liquid fertilisers & trace elements

are used in times of stress for rapid and effective balancing of plant nutrients. Liquid fertilisers allow you to reduce and fine tune your nutrient inputs throughout the growing season.

Copper

is essential for chlorophyll production and the correct operation of photosynthesis. It also acts as an enzyme activator. Deficient turf has stunted withered leaves often with a dark blue green colour, and dead or brown spots.

Application guide: *For best results consult your Symbio representative.
