For full operating manuals and maintenance instructions for the brewers visit [www.symbio.co.uk](http://www.symbio.co.uk)

### Symbio Compost Tea Bags

Have been specially designed for use with compost teas made from the brew packs in Symbio brewers. Made from extremely hard wearing mesh fabric, the large or small compost tea bag holds the compost and allows it to be suspended in the optimum area of the brewer above the air diffuser. The mesh size of the tea bag allows all the useful biology from the compost to pass into the tea without the larger solids.
