

SYMBIO LIQUID FERTILISERS WITH SEAWEED, HUMIC ACID AND TRACE ELEMENTS

Benefits

- ✓ *Easy to apply*
- ✓ *Use as a foliar feed or soil drench*
- ✓ *Tank mixable with biostimulants, wetting agents, Liquid Aeration*
- ✓ *Reduce total fertiliser use*

LIQUID FERTILISERS WITH HUMIC ACID AND SEAWEED

20.0.10

EASY TO APPLY, readily available nutrients with Biostimulants for all heavily used sports turf

SYMBIO RECOMMENDS applying as little inorganic fertiliser as possible. Liquid fertilisers allow you to reduce and fine tune your nutrient inputs throughout the growing season.

SYMBIO LIQUID FERTILISERS contain seaweed and humic acid as a biostimulant to help nutrient uptake into the plant they also feed the bacteria and fungi which form the foundation of the soil food web.

APPLICATION RATE

20L/Ha in 400 -600L of water.

Refer to individual product labels for specific details

SYMBIO LIQUID FERTILISERS may be tank mixed with Symbio Hydro Aid Plus, Symbio Humic Booster, Symbio Silicon, Symbio Liquid Aeration.

PACK SIZE: 20L ▪ 200L ▪ 1000L per 1,000L tanks and have your tank refilled.

LIQUID TRACE ELEMENTS

In times of stress a rapid balancing of trace elements may be needed. Symbio's liquid formulations may be used by themselves or to top up any liquid fertiliser to ensure the correct nutrients are applied for your sward

FOLIAR APPLICATION ensures rapid replacement of essential trace elements.

Liquid Magnesium	5% Mg
Liquid Calcium	6% Ca
Liquid Manganese	6% Mn
Liquid Sulphur	34% S
Liquid Boron	15% B

APPLICATION Refer to individual Trace Element labels for specific application rates.

PACK SIZE: 10L

HEALTH AND SAFETY Some products are harmful or irritants refer to individual MSDS for specific product details.
